

Getting Claude — a five-minute setup

Free plan · no credit card · the same Google sign-in you used all week

claude.ai

On your phone

1. Open your camera and **scan the QR** above (or type `claude.ai` in your browser).

✓ You see the Claude page with a sign-in button.

2. Tap “**Continue with Google**” and choose the Google account you used this week.

✓ Claude greets you with an empty chat box — you are in. The free plan starts automatically.

3. Type anything — even just *hello* — and send it.

✓ If it replies, everything works.

💡 Prefer a real app? Open the **App Store** (iPhone) or **Google Play** (Android), search “**Claude by Anthropic**”, install, then sign in the same way.

On your computer

1. Open any browser (Chrome, Edge, Safari) and go to `claude.ai`.

✓ Nothing to install — Claude runs inside the browser.

2. Click “**Continue with Google**” — the same account as on your phone.

✓ Your chats appear on both devices, automatically.

3. Pin the tab, or bookmark it — that is the whole installation.

💡 On a work computer that blocks sign-ins, just use your phone — same Claude, same account. Never type your password on a shared or borrowed machine.

Your first three moves (ten minutes, tonight)

1. **Say hello in Bahasa Melayu** — and ask for the reply in English. Claude speaks both.

2. **Paste a small table** (fictional data only!) and ask: “*Draw a bar chart of [X] by [Y], with an honest caption: total, units, source.*” Watch it draw — then check one bar by hand.

3. **Give it a five-part instruction** — Role, Task, Context, Constraints, Format — the same art you learned on Monday. It works here too: same instruction, different buttons.

The rules travel with you. Free Claude is a public AI tool, like the others you trained with — so the three-way sort applies here too: **Public** — paste freely · **Internal** — anonymise first · **Confidential or personal** — never, in any form. And before anything leaves your desk: **verify** — **find one thing to fix**. AI drafts. You decide.

Questions? Ask the question box on the dojo page — the Librarian answers each evening through late September.

The Claude Hour — 15:00–16:00 / Jam

terakhir, alat keempat

Material: **Brunei Economic Outlook 2026** — the Centre's own public report (csps.org.bn · 55 pages · public: paste freely)

15:00 ① Meet Claude — sign in (5 min) / Log masuk

Go to **claude.ai** → “Continue with Google” — the same account you used all week. Free plan, no card. Stuck? **Share your partner's screen** — the neighbour's-tool rule. *Tersekat? Kongsi skrin rakan anda.* The setup guide is in the Dojo Library.

15:05 ② The BEO2026 demo (12 min) / Demonstrasi

Open the report from the Dojo Library (“Brunei Economic Outlook 2026 — official”), attach the PDF, and run the four prompts in order — written in the village's own **#hash style**: the five-part art, exactly as taught. *Gaya # kampung kita.*

PROMPT 1 — THE SUMMARY, WITH PAGE NUMBERS (Source-Binding, live)

```
#role you are briefing a new staff member of the Centre
#task summarise the attached Brunei Economic Outlook 2026: 5 bullets, then the 3 numbers a director will most likely quote
#constraints give the page number for every number
#format short bullets, then a numbered list of the 3 figures
```

★ The moment that matters: take ONE number Claude quotes and open the report to that page. Ten seconds, a real report. *Semak dahulu, baru percaya — check first, then trust.*

PROMPT 2 — THE GAP QUESTION (from Monday)

```
#task list what this report does NOT cover that a reader might expect
```

PROMPT 3 — THE FIVE-SLIDE OUTLINE

```
#task turn the report into a five-slide briefing outline
#constraints each title states the takeaway (not a topic); 3 bullets maximum per slide; one speaker note each; cite the source page
#format a table I can paste into PowerPoint
```

PROMPT 4 — THE CHART, AND THE TWIST

```
#task draw a bar chart from the [sector/GDP] table on page [X]
#constraints honest caption — total, units, source (BEO 2026, p.X)

then the twist:
#task now draw the misleading version on purpose
```

🗨️ Say it plainly: “What Claude gives you is the outline and the notes — pasting them into PowerPoint is your two minutes. That is the real office workflow.”

15:17 ③ Pair build: “From the Outlook to the boardroom” (35 min) / Kerja berpasangan

Every pair, same report, end to end: a **five-slide outline with source pages** + **one honest chart** (caption: total · units · source · full axis) + a **five-line memo**. Then sign it — *AI-assisted, verified by [name]* — and place your consent dot if your reusable prompt may join the Village Template Shelf.

Wi-Fi rule: ONE phone per pair uploads the PDF, table by table. *Satu telefon untuk setiap pasangan.* The facilitator asks one question only: “What did you check?”

15:52 ④ The reveal — the scroll is already open (5 min) / Gulungan sudah terbuka

Project the dojo: **The Hidden Scroll of Numbers** unlocked at lunch. Tap its five arts — Two-Path Verification · Source-Binding · The Honest Chart · The Signing Code · End-to-End Mastery — and say it: “In this one hour, you used all five.”

🗨️ The bridge: “16:00 — ten minutes, your phones: the post-workshop survey. Today your answers measure us, not you.” / *Tinjauan akhir — jawapan anda mengukur kami, bukan anda.*

Then: **16:00** post-survey (in the room, own phone) → **16:15** closing — the thesis · what comes next: agents · the Training Grounds · **Yellow Belts & certificates** · group photo. *Majlis penutup · Gambar berkumpul.*

Always on screen: fictional data only · verify — find one thing to fix · **AI drafts. You decide.**
